Second Quarter, 2007

The concept of a one-percent food and beverage tax to support the arts in Tippecanoe County was revisited during the second quarter. The Lafayette-West Lafayette Economic Development Corporation supports the tax, which would be split evenly between Wabash River development projects and arts organizations. But there is not widespread agreement in the business community.

The city of West Lafayette began a media campaign to educate residents and businesses about the newly-approved ban on smoking in most work places. The ban took effect on the first day of July, 2007.
